Appendix 1

HEALTH AND SAFETY POLICY
AS REQUIRED BY
THE HEALTH AND SAFETY AT WORK ETC. ACT 1974
FOR
E H HUMPHRIES (NORTON) LIMITED

1.0 HEALTH AND SAFETY POLICY STATEMENT

- 1.1 **This is the Health and Safety Policy Statement** under the Health and Safety at Work etc. Act 1974 for **E H Humphries (Norton) Limited**.
- 1.2 **It is the policy of E H Humphries (Norton) Limited** to conduct its activities with regard for the health and safety of all its employees and members of the public.
- 1.3 **The management of E H Humphries (Norton) Limited** accepts its obligations and responsibility to take all necessary steps to ensure that all systems of work are as safe as is reasonably practicable and all equipment is maintained in a safe condition and operated correctly.
- 1.4 E H Humphries (Norton) Limited will take all reasonable steps to **promote, monitor and maintain** the highest degree of physical, mental and social wellbeing of all interested parties and protect them from factors adverse to their health.
- 1.5 **To prevent as far as is reasonably possible**, any improper conduct or behaviour likely to put the Safety, Health & Welfare of employees at risk.
- 1.6 E H Humphries (Norton) Limited is committed to the protection and promotion of the **mental health and wellbeing** of all staff.
- E H Humphries (Norton) Limited shall continuously strive to improve the mental health environment and culture of E H Humphries (Norton) Limited by identifying, eliminating, or minimising all harmful processes, procedures and behaviours that may cause psychological harm or illness to its employees.
- E H Humphries (Norton) Limited shall continuously strive, as far as is reasonably practicable, to promote mental health throughout E H Humphries (Norton) Limited by establishing and maintaining processes that enhance mental health and wellbeing.
- 1.7 **We will ensure** that any substances are used and handled in a safe manner.
- 1.8 **Relevant training** will be provided and the competence of all employees to fulfil their responsibilities under this policy will be ensured.
- 1.9 **Adequate information**, instruction and supervision will be made available for every employee.
- 1.10 **Employees will be consulted** on matters affecting health and safety and this policy and any revisions will be brought to their attention.
- 1.11 **All employees** will be expected to exercise personal responsibility in preventing work related ill health and injury to themselves and others and to co-operate with the management in complying with their obligations under the health and safety legislation.
- 1.12 **It is the intention** of E H Humphries (Norton) Limited to comply with both the requirements and the spirit of the Health & Safety at Work etc. Act 1974 and all regulations and Codes of Practice made under this act.

- 1.13 **E H Humphries (Norton) Limited will abide by** any Government instruction and guidance, which will affect any persons within their employment, in order to protect their health and safety.
- 1.14 **E H Humphries (Norton) Limited** will not discipline, discharge, suspend, lay off or demote an employee or impose any financial or other penalty on an employee who refuses to work where the use or operation of a machine or a method of working constitutes a danger to the employee or another person or where site conditions constitute a danger to the employee.
- 1.15 **This policy** will be brought to the attention of employees during their induction. It will be reviewed at regular intervals, revised as necessary and any amendments brought to the attention of the employees.

Signature		Position	Managing Director
Date	April 2026	Review date	April 2027

2.0 ORGANISATION AND RESPONSIBILITIES

- 2.1 **Overall responsibility** for health and safety within E H Humphries (Norton) Limited is held by D Weldon who is appointed to ensure the implementation of this policy. They will ensure information regarding health and safety matters is cascaded through the management team to all employee levels.
- 2.2 **Other directors, managers and staff** will be delegated duties and responsibilities under this policy as detailed in the following sections and structures below.
- 2.3 **Expert Advice** is provided by R. G. Wilbrey (Consultants) Limited, Aspen House, Great Brickkiln Street, Wolverhampton, West Midlands, WV3 OPT - Telephone 01902 420920 Email info@rgwilbrey.uk.com who are retained by E H Humphries (Norton) Limited to advise them on all matters relating to health and safety at work. Safety Consultants from R. G. Wilbrey (Consultants) Limited will be available to visit all premises and operations under E H Humphries (Norton) Limited's control in order to ensure that healthy and safe working conditions are being maintained and that this policy is being observed when requested to do so. The Directors of R. G. Wilbrey (Consultants) Limited have access to the Safety Executive to discuss health and safety matters whenever necessary.
- 2.4 **Funds and facilities** will be made available to meet the requirements of the policy including ensuring adequate allowance is made for suitable welfare facilities, equipment, vehicles, systems of work and training. This is to avoid injury and damage to the health of employees and others who may be affected by E H Humphries (Norton) Limited's undertakings.
- 2.5 **Management will actively encourage safe working** practices and ensure that all safety rules, instructions and legal requirements are complied with, in respect of the operations carried out under their control. The Projects will be managed by the site manager or supervisor, who will work closely with the Contracts Manager and E H Humphries (Norton) Limited H&S Consultants to ensure the work, is planned, adhered to, monitored and reviewed to maintain standards. Work will only take place whilst adequate supervision is available.
- 2.6 **Employees must report immediately** any potentially dangerous situation or condition to their manager or the Managing Director. This includes any defective equipment, dangerous working practice, unsatisfactory personal protective equipment or any other hazard.
- 2.7 **Labour only (self-employed) sub-contractors** employed or engaged directly by E H Humphries (Norton) Limited will be treated as employees for health and safety purposes
- 2.8 **It is an offence** under the Health & Safety at Work etc. Act 1974 for any person(s) to intentionally or recklessly interfere with, or misuse anything provided in the interests of health, safety or welfare. Appropriate disciplinary action will be taken against anyone found interfering with or misusing these items.
- 2.9 **Joint consultation** on health and safety matters will be encouraged and the requirements of the Safety Representatives and Safety Committees Regulations 1977 and the Health & Safety (Consultation with Employees) Regulations 1996 will be complied with. The main function of these consultations is to draw attention to any unsafe practices which become apparent and to bring forward suggestions for better safety standards and practices. Consultations will be encouraged during regular meetings.

- 2.10 **The environmental policy** of E H Humphries (Norton) Limited is to organise its operations in such a manner that there will be minimal damage to the existing environment. This policy will be achieved by incorporating the necessary control measures into method statements, risk assessments and into the training of all company personnel.
- 2.11 **Working safely with electricity** is controlled by the Electricity at Work Regulations 1989 and it is our policy to strictly comply with these requirements. In addition, the Institute of Electrical Engineers (IEE) Regulations (18th edition) cover the safe design and installation of electrical systems. It should be noted that the IEE Regulations are *not* statutory requirements but provide guidance for electrical contractors to follow. Work done in accordance with the IEE Regulations should satisfy the requirements of the Electricity at Work Regulations 1989.
- 2.12 **Employment will be based upon competency.** Discrimination because of age, gender, ethnic origin, sexual orientation or being classed as disabled will not be permitted.
- 2.13 **It is E H Humphries (Norton) Limited's legal duty** to revise this policy statement as often as may be appropriate to take into account changes in the law affecting E H Humphries (Norton) Limited's operations, or changes in E H Humphries (Norton) Limited and arrangements for carrying out this policy. Any revisions found to be necessary will be communicated to each employee. This policy will be reviewed annually.
- 2.14 **Documentation Statutory Retention Periods:**

RECORD	STATUTORY RETENTION PERIOD	STATUTORY AUTHORITY
Accident books, accident records/reports	3 years from the date of the last entry (or, if the accident involves a child/young adult, then until that person reaches the age of 21). (See below for accidents involving chemicals or asbestos)	The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR)(SI 2013/1471) and Limitation Act 1980. Medical examination certificates	40 years from the date of the last entry, 4 years from the date of issue	The Control of Asbestos at Work Regulations 2002 (SI 2002/ 2675). Also see the Control of Asbestos Regulations 2006 (SI 2006/2739) and the Control of Asbestos Regulations 2012 (SI 2012/632)
Medical records under the Ionising Radiations Regulations 1999	Until the person reaches 75 years of age, but in any event for at least 50 years	The Ionising Radiations Regulations 2017(SI 2017/1075)
Records of tests and examinations of control systems and protective equipment under the Control of Substances Hazardous to Health Regulations (COSHH)	5 years from the date on which the tests were carried out	The Control of Substances Hazardous to Health Regulations 1999 and 2002 (COSHH) (SIs 1999/437 and 2002/2677)
Records relating to children and young adults	Until the child/young adult reaches the age of 21	Limitation Act 1980
Retirement Benefits Schemes – records of notifiable events, for example, relating to incapacity	6 years from the end of the scheme year in which the event took place	The Retirement Benefits Schemes (Information Powers) Regulations 1995(SI 1995/3103)
Statutory Maternity Pay records, calculations, certificates (Mat B1s) or other medical evidence	3 years after the end of the tax year in which the maternity period ends	The Statutory Maternity Pay (General) Regulations 1986(SI 1986/1960) as amended
Wage/salary records (also overtime, bonuses, expenses)	6 years after employment ceases	Taxes Management Act 1970
National minimum wage records	3 years after the end of the pay reference period following the one that the records cover	National Minimum Wage Act 1998
Records relating to working time	2 years from date on which they were made	The Working Time Regulations 1998 (SI 1998/1833)

2.15 **The Quality Policy** for E H Humphries (Norton) Limited is to ensure that its products and services meet the needs of its customers at all times in accordance with contractual requirements, its policies and procedures.

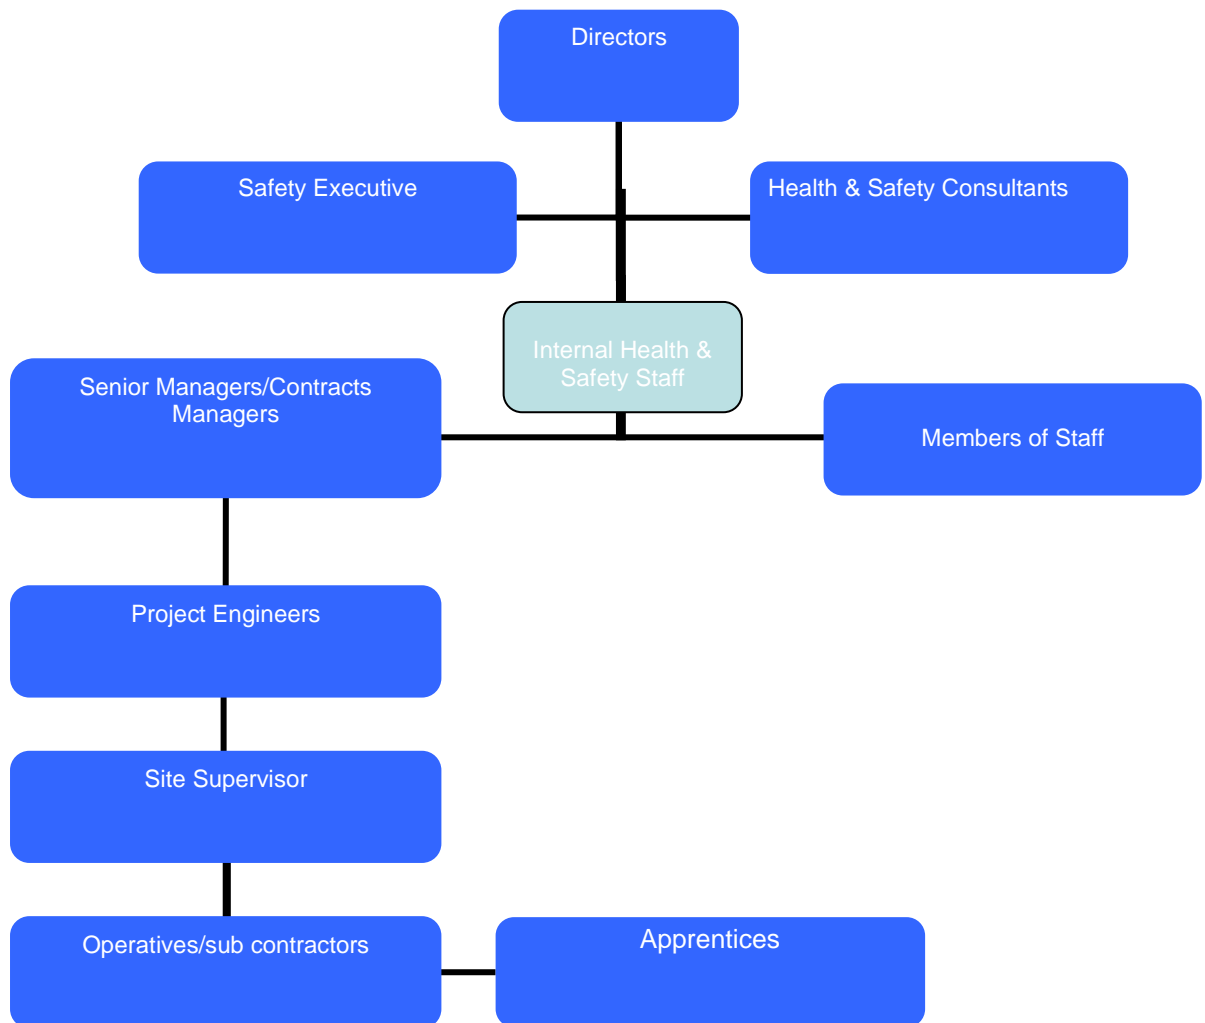

The Management are committed to:

Developing and improving the Quality Management System

Continually improve the effectiveness of the Products and Service provided

The enhancement of customer satisfaction

2.16 E H Humphries (Norton) Limited's health and safety management structure is as follows:-

2.17 **The Directors** are responsible for:-

- 2.17.1 Understanding the requirements of E H Humphries (Norton) Limited's Health & Safety Policy and ensuring that E H Humphries (Norton) Limited's activities are conducted in accordance with this Policy.
- 2.17.2 Developing and maintaining a culture that achieves high standards of health and safety management throughout E H Humphries (Norton) Limited.
- 2.17.3 Appointing a director or other senior member of the management team as Safety Executive with responsibility for implementing the Policy.
- 2.17.4 Reprimanding any employee failing to discharge satisfactorily the responsibilities to him.
- 2.17.5 Arranging for employees representatives to be consulted and implementing safety meetings.
- 2.17.6 Insisting that sound working practice is continuously observed.
- 2.17.7 Creating policy to co-ordinate safety activities between contractors.
- 2.17.8 Implementing and monitoring procedures to ensure risk assessments are carried out and the relevant information is communicated.
- 2.17.9 Introducing health surveillance where this is appropriate and a significant risk is identified and ensuring records are maintained.
- 2.17.10 Ensuring that adequate funds & resources are made available to meet the requirements of the policy.
- 2.17.11 Ensuring procedures are in place so that all new employees receive a safety induction.
- 2.17.12 Identifying training needs and arranging for employees to receive appropriate training. Ensuring records are maintained of employees training.
- 2.17.13 Ensuring that management and employees continually focus their attentions and actions on theirs, and others, daily safety behaviour to assist in the continued improvement in E H Humphries (Norton) Limited's health and safety strategy to encourage compliance and discourage negative behaviour.
- 2.17.14 Ensuring procedures are in place so that Injuries, Diseases and Dangerous Occurrences are reported in accordance with legislation and that records are maintained.
- 2.17.15 Instituting proper reporting, investigation and costing of injury, damage or loss; promoting action to preclude recurrence and initiating analysis to discover accident trends and potential hazards from the reports of site staff and Safety Consultants.
- 2.17.16 Arranging for adequate first aid facilities and a sufficient number of trained first aid attendants in the administrative office and workshop.

- 2.17.17 Ensuring that a fire risk assessment is carried out, and updated annually, for all premises and projects under the control of E H Humphries (Norton) Limited. Arranging for the equipment and procedures required by the assessment to be provided, tested and maintained.
- 2.17.18 Arranging for an adequate number of fire extinguishers of a suitable type to be positioned in the office and around the site.
- 2.17.19 Ensuring that a satisfactory procedure for evacuating the office/site building in the event of a fire, or other emergency is implemented and periodically practised.
- 2.17.20 Being familiar with the Health & Safety at Work etc., Act 1974 particularly those requirements which impinge on each Director's executive responsibilities.
- 2.17.21 Periodically reviewing and amending the policy as necessary.
- 2.17.22 Promoting good health and safety practice through example.

- 2.18 **E H Humphries (Norton) Limited's Safety Consultants** are responsible to E H Humphries (Norton) Limited Safety Executive for:-
- 2.18.1 Advising E H Humphries (Norton) Limited on health and safety and statutory compliance.
 - 2.18.2 Advising E H Humphries (Norton) Limited's management on their responsibilities for ensuring employees comply with all statutory requirements in health and safety matters.
 - 2.18.3 Providing advice on training and carrying it out when requested.
 - 2.18.4 Assisting in the preparation of risk assessments and other safety related documentation as required.
 - 2.18.5 Advising E H Humphries (Norton) Limited on measures to reduce the risk of injury or ill-health of any person employed by E H Humphries (Norton) Limited or any member of the general public as a result of any work undertaken by E H Humphries (Norton) Limited.
 - 2.18.6 Providing advice on the implementation and communication of safe working systems and procedures.
 - 2.18.7 Carrying out regular and systematic inspections as instructed by E H Humphries (Norton) Limited to ensure that E H Humphries (Norton) Limited Safety Policy and relevant statutory requirements are complied with.
 - 2.18.8 Reporting any blatant or persistent disregard of normal standards of safety.
 - 2.18.9 Investigating accidents and other safety related incidents when requested.
 - 2.18.10 Promoting good health and safety practice through example.

2.19 **Senior Managers / Project Engineers** are responsible to the Directors for:-

- 2.19.1 Understanding E H Humphries (Norton) Limited Safety Policy and the duties assigned to them under this policy.
- 2.19.2 Pre-planning their operations, having due regard to the health, safety and welfare of employees and sub-contractors personnel.
- 2.19.3 Ensuring that the requirements of the Construction (Design & Management) Regulations 2015 are implemented and the procedures set out in the health and safety plan are complied with.
- 2.19.4 Ensuring that any other contractors on site work competently and comply with the procedures set out in the health and safety plan.

 - 2.25.8 Anyone under the age of 18 will not be exposed to radiation, noise and vibration, toxic substances or extreme temperatures.

2.26 **E H Humphries (Norton) Limited's Internal Health and Safety Staff** are responsible to E H Humphries (Norton) Limited for:-

- 2.26.1 Advising E H Humphries (Norton) Limited on health and safety and statutory compliance.
- 2.26.2 Advising E H Humphries (Norton) Limited's management on their responsibilities for ensuring employees comply with all statutory requirements in health and safety matters.
- 2.26.3 Providing advice on training and carrying it out when requested.
- 2.26.4 Creating and distributing health and safety related documentation as required.
- 2.26.5 Advising E H Humphries (Norton) Limited on measures to reduce the risk of injury or ill-health of any person employed by E H Humphries (Norton) Limited or any member of the general public as a result of any work undertaken by E H Humphries (Norton) Limited.
- 2.26.6 Ensuring that communication of safe working systems and procedures is being undertaken.
- 2.26.7 Carrying out regular and systematic inspections, investigations and audits as instructed by E H Humphries (Norton) Limited to ensure that E H Humphries (Norton) Limited Safety Policy, safety documentation and relevant statutory requirements are complied with.
- 2.26.8 Reporting any blatant or persistent disregard of normal standards of safety.
- 2.26.9 Investigating accidents and other safety related incidents when requested.
- 2.26.10 Promoting good health and safety practice through example.

3.0 ARRANGEMENTS

- 3.1 **Where E H Humphries (Norton) Limited's arrangements** for health and safety need to be explained in more detail this will be done in procedural guides, specific site health and safety plans, method statements or risk assessments.
- 3.2 **Emergency procedures, Office Based** - will be detailed in risk assessments and method statements and reviewed periodically. This information will be brought to the attention of new employees during their induction.
- 3.3 **Emergency procedures, Site Based** – On construction sites the Directors/Supervisor will ensure that the principal contractor has this requirement in place and available. This will be confirmed during the on site induction.
- 3.4 **First Aid, Office Based** - First aiders and persons trained in Emergency First Aid at Work (EFAW) or Appointed Persons will be appointed as relevant for each of E H Humphries (Norton) Limited's sites or premises. A fully equipped first aid box will be available at each place of work.
- 3.5 **First Aid, Site based** – On construction sites the Directors/Supervisor will ensure that arrangements are made available with the principal contractor. This will be confirmed during the on site induction.
- 3.6 **Accidents**, no matter how small, will be reported to the appropriate person and details entered in the accident book. Any injury should receive immediate first aid treatment by a first aider followed by hospital treatment if this should be necessary. In the event of a serious injury or dangerous occurrence E H Humphries (Norton) Limited's safety consultants will be informed and if it is specified in the Reporting of Injuries, Diseases and Dangerous Occurrence Regulations 2013, the incident will be reported to the Health & Safety Executive. Reporting requirement amended for over-three-day injuries to over-seven-day injuries to be reported within 15 days and via the HSE on-line form. Reportable accidents will be 'out of or in connection with work' and will include; the death of a person, a major injury, gas incident, disease or dangerous occurrence specified within the ACoP, an injury which incapacitates or prevents the injured person from working for over 7 days or an injury to a member of the public that requires them to attend hospital from the scene of the accident.
- 3.7 **Accident Investigations** will be carried out by E H Humphries (Norton) Limited's health and safety consultants as requested by E H Humphries (Norton) Limited Safety Executive. Serious accidents reported under RIDDOR as well as minor accidents and near misses, if trends appear to be developing, will be investigated to try and discover the events leading up to and the cause of the accident, those involved and any injuries or damage caused. The investigation report will be retained by E H Humphries (Norton) Limited for 10 years.
- 3.8 **Welfare Facilities** will be provided by E H Humphries (Norton) Limited in accordance with current legislation. On construction sites the site management will establish the facilities to the legal standard before work starts, taking into account sub-contractors requirements. Thereafter, the facilities will be maintained to a good standard and kept in a clean and hygienic condition. Where E H Humphries (Norton) Limited is in a sub-contract position, arrangements will be made with the principal contractor to use their welfare facilities.
- 3.9 **Sites will be kept tidy** and free of trip hazards. Everyone on site will take responsibility for keeping their work area clear and removing any debris they produce to the skips provided. Site management will ensure that access routes are kept clear.

- 3.10 **Induction training** will be carried out for all new personnel and also for existing personnel where new procedures are introduced. This will be arranged by the employees line manager and include information on this policy and the employees responsibilities under it, the location of welfare and emergency equipment and other information as deemed necessary by E H Humphries (Norton) Limited Safety Executive. Special risk situations will be assessed and the need for specific instruction and/or training identified.
- 3.11 **Young persons** must receive a specific induction during which the dangers they may encounter and warnings about horseplay and unsafe practices must be emphasised. There are specific restrictions on the type of work that young persons can carry out and a risk assessment must be carried out for the duties they will be expected to undertake. See Young Persons Induction Form and Risk Assessment.
- 3.12 **Training** will be provided for all employees to ensure they have the necessary knowledge to carry out their duties competently. Training needs will be periodically assessed and records of training provided will be maintained. General site safety training will be provided for site operatives and this will take the form of on-site toolbox training, having content suitable for the operations being carried out.
- 3.13 **When new plant,** equipment, processes or substances are introduced the Directors will ensure the necessary training is provided. They will ensure that new plant, equipment etc is as safe as is reasonably practicable, fully efficient and has been tested and thoroughly examined in accordance with regulations.
- 3.14 **Arrangements will** be made to ensure that Site Supervisors are aware of any safety instructions issued with the plant, substances, equipment and processes and operatives will receive training or instruction in their operation or application.
- 3.15 **Consultation with employees** on health and safety matters is a legal requirement on employers, particularly in respect of:-
- 3.15.1 The introduction of any measure which may substantially affect health or safety
 - 3.15.2 Arrangements for appointing competent persons to assist the employer to meet statutory requirements.
 - 3.15.3 The provision of information specifically required by regulations.
 - 3.15.4 The planning and organisation of training required by regulations.
 - 3.15.5 The consequences of introducing new technology.
- E H Humphries (Norton) Limited operate an open door policy whereby all employees have access to directors and supervisor to air their views and raise any concerns they may have with regard to health and safety.
- 3.16 **Safety Representatives** can be appointed by a recognised Trades Union where members of that union are employed at a site or office. Where there is no recognised Trades Union a group of employees may elect someone to represent them for health and safety consultation with the employer.
- 3.17 **Safety Committees** will be established if requested by at least two safety representatives.

- 3.18 **Risk assessments** will be carried out, and written records prepared as necessary, with control measures to minimise the identified risks. The line management will keep the need for risk assessments in mind when planning operations and seek expert advice when necessary. In carrying out risk assessments, due consideration will be paid to the need for assessments to be made under all relevant health and safety regulations.
- 3.19 **Monitoring Audit & Reviews** will be carried out to ensure that systems of work, procedures and control measures are suitable and will lower risk to an acceptable level, ensuring that work activities do not adversely affect an employee's health or safety.
- 3.20 **Permits to Work** will be used when required by risk assessment, employer's requirements or company rules.
- 3.21 **Where the health and safety of the public** might be affected by E H Humphries (Norton) Limited's operations E H Humphries (Norton) Limited fully accepts its legal responsibility. All operations will be conducted with this in mind and each site will be left in a safe condition at the end of each working day. Due consideration will be given to this aspect of health and safety when COSHH, Noise and Management risk assessments are being compiled.
- 3.22 **Plant and work equipment** will be inspected, tested and checked in accordance with legislation. The Responsibilities section of this Policy detail who is responsible in each case.
- 3.23 **All defects in plant**, equipment and vehicles must be reported by the site management to the Directors immediately and, if necessary, the use of any such item should be prohibited until the necessary repairs have been carried out. The Directors will be responsible for responding to such reports and arranging for the necessary repairs to be carried out without delay. All plant, equipment and vehicles will be maintained and serviced in accordance with the existing Company schedules/manufacturers schedules.
- 3.24 **Company vehicles** must only be driven by persons authorised by E H Humphries (Norton) Limited who hold a current driving licence for the appropriate class of vehicle. Road traffic legislation must be complied with including the wearing of safety belts. E H Humphries (Norton) Limited's rules concerning use of company vehicles will be made available to all company drivers.
- 3.25 **Fire Fighting and Escape facilities** will be provided in all areas under E H Humphries (Norton) Limited's control. The facilities and equipment provided will be determined by risk assessment, the contents of which will, if necessary, be communicated to the fire service. Fire Alarms, emergency lighting, fire control equipment and emergency escape routes will be inspected and tested at regular intervals by the person(s) appointed by E H Humphries (Norton) Limited Safety Executive.
- 3.26 **Alcohol, drug and substance abuse** by employees and sub-contractors can adversely prejudice the safety of themselves, their colleagues and others and therefore it is the policy of E H Humphries (Norton) Limited that a **ZERO TOLERANCE** approach will be enforced which will include the **RANDOM TESTING** of individual's on a rolling-twelve month period. In addition to this, the testing of individuals may also be undertaken following a health & safety related incident that has the potential to cause harm or where there are reasonable grounds for suspecting they may have breached this policy or are working under the influence of drugs or alcohol. In the event of refusal or positive testing, the individual will be subject to disciplinary action. Where an employee makes known to E H Humphries (Norton) Limited they have an alcohol or drug related problem, advice, guidance and referral to professional

advisory services will be available. Employees and sub-contractors will be issued with a comprehensive briefing document relating to this policy arrangement.

- 3.27 **When the long term health of an employee or sub-contractor** is at risk due to equipment, materials or processes E H Humphries (Norton) Limited will undertake monitoring or screening as required. This may include regular blood or urine checks for operatives carrying out high risk lead work or health checks on those using vibrating tools.
- 3.28 **Materials used or stored by E H Humphries (Norton) Limited** or encountered during its operations will be assessed and if there is a substantial risk to employee alternatives will be sought. If this is not reasonably practicable then control measures will be implemented including, if appropriate, health monitoring. Written COSHH assessments will be prepared detailing the risk and any control measures and will be reviewed whenever the substance changes or is required to be used in a different manner than was originally considered.
- 3.29 **COSHH** - Suppliers of materials are required to produce adequate Safety, Health and Environmental information to support their products. Where we as contractors are able to we will, substitute hazardous materials for less harmful ones. If designers and clients are able to substitute hazardous materials for less harmful ones we request that they do so

COSHH Assessments are carried out on all potentially hazardous materials used by E H Humphries (Norton) Limited Copies of these assessments are provided to the operatives using the material. Method Statements associated with these substances will identify principles to minimise risk. Employees are instructed not to use a substance unless they have read and understand the COSHH assessment.

Specific legislation on hazards that arise from working with biological agents such as BBVs (Blood Borne Viruses) is contained in the Control of Substances Hazardous to Health Regulations 2002 (as amended) (COSHH). Under these regulations we have a legal duty to assess the risk of infection for employees and others affected by the work. When the risk is known, we will take suitable precautions to protect your health.

We provide information, training and instruction for employees who work with substances hazardous to health and ensure they are understand the outcome of the associated risk assessment and what this means for them. They will be trained in emergency procedures including;

- The correct equipment to deal with the emergency (eg a spill), including protective equipment and decontamination products;
- The correct procedures to deal with a casualty;
- The people trained to take action;
- The arrangements to deal with the waste created

- 3.30 **Dermatitis** is inflammation of the skin that can arise from contact with a range of materials. The main signs and symptoms are dryness, redness, itching, swelling, flaking, cracking and blistering, and it can be very painful. Work-related dermatitis is caused or made worse by work. As employers we will ensure that workers' health is protected by identifying hazards, assessing risks, avoiding exposure and, where this is not possible, managing the remaining risk.

All employees will have ready access to welfare facilities supplied with running hot/warm and cold water in which they can wash their hands and forearms or other exposed parts of the skin. Suitable soaps, cleaners, barrier creams and hand creams are provided. The

provision and use of pre- and after-work creams, and skin checks, are other critical elements for managing the residual dermatitis risk.

- 3.31 **Respiratory** - We understand that as employers must reduce the exposure of workers to substances that can cause respiratory disease or breathing difficulty if inhaled. This is done by eliminating the hazard where possible or controlling the substance by means other than respiratory protective equipment (RPE), e.g. by water suppression or on tool extraction of the hazard. As a last resort, PPE may be needed along with clear information, instruction and training in the use of respiratory equipment for those exposed to the risk.

All items likely to expose workers to any respiratory hazard will be covered by a relevant COSHH assessment, these will be reviewed to ensure the correct precautions and RPE is used in each instance. When selecting RPE E H Humphries (Norton) Limited will assess each individual to ascertain which RPE will be most appropriate. Once RPE is selected, before any equipment can be used, face fit testing will be carried out for those who are clean shaven. Facefit testing will be carried out at intervals inline with HSE guidance and depending on work procedures being undertaken. E H Humphries (Norton) Limited will also monitor workers and should there be any major physical change to the worker utilising the RPE face fit will be retested to ensure there is adequate protection. The records for all face fit testing will be made available to the Principal Contractor / Client upon request.

E H Humphries (Norton) Limited will make provisions for those who are not clean shaven or arrive at work with facial hair, stubble etc. By means of providing an air fed hood or changing their work processes to ensure that these individuals are not being exposed to construction dust or other respirable hazards.

All operatives will be familiar with and trained in the correct use of respiratory protective equipment and any required dust extraction / dust mitigation control measures.

- 3.32 **Control of Asbestos 2012** - Asbestos containing material, is now prohibited in this country, however, existing asbestos containing materials (ACM's) might be encountered. E H Humphries (Norton) Limited will not work on an existing building until a Refurbishment/demolition asbestos survey in accordance with HSG264 has been carried out or there is clear evidence from the health and safety file that asbestos is not present. Where asbestos is present and will be disturbed a risk assessment and clear plan of work will be prepared. Where necessary E H Humphries (Norton) Limited will ensure that all personnel have sufficient and appropriate training to be able work with asbestos this applies for all types of asbestos and advice will always be taken from qualified asbestos professionals even with non-licensed asbestos as it may be notifiable work.

- 3.33 **Health Surveillance** -. E H Humphries (Norton) Limited will consult with employees over the proposed arrangements for health surveillance and for the need for affected employees to participate in these arrangements. E H Humphries (Norton) Limited will inform affected employees of the health risks and of the health surveillance procedure. The person carrying out the health surveillance procedure is competent to undertake the task and will ensure that the results of health surveillance are suitably recorded. Suitably action any recommendations made as result of health surveillance and if necessary review the associated risk assessment. E H Humphries (Norton) Limited will treat an individual's health surveillance records as confidential information and will inform employees of the collective results of health surveillance, but ensuring that no individual is identified ensuring that health surveillance records are retained for statutory retention periods

3.34 **Personal Protective Equipment** will be provided for all employees. Operatives must look after the equipment provided and use it in accordance with the training given. Employees are responsible for informing their supervisor if their PPE is lost or damaged so that free replacement can be provided.

3.35 **The Electricity at Work Regulations 1989** covers the safe use of all electrical equipment and systems, ranging from high voltage overhead lines to battery-operated equipment. The aim of the regulations is to prevent the risk of injury arising out of work activities both on, or with, electrical systems.

The requirements of the regulations cover:

- construction and maintenance of systems and the provision of suitable protective equipment (reg 4);
- strength and capability of electrical equipment (reg 5);
- adverse or hazardous environments (reg 6);
- insulation, protection and placing of electrical conductors (reg 7);
- earthing of conductors (reg 8);
- integrity of referenced conductors (reg 9);
- electrical connections (reg 10);
- protecting against excess current flow (reg 11);
- isolation of electrical supplies (reg 12);
- working on dead equipment (reg 13);
- working on live conductors (reg 14);
- working space, access and lighting (reg 15);
- competent persons (reg 16).

Before work on new or existing electrical systems commences the system of work should be planned to ensure that the system of work complies with the requirements of these regulations, in addition to all other relevant safety legislation. Risk assessments, method statements and permits to work will need to be prepared as appropriate. Professional advice will be requested as required to ensure the systems of work procedures that are in place satisfy the legal requirements.

3.36 **Work at Height** - E H Humphries (Norton) Limited understands the risks of working at height and will therefore avoid work at height where practicable. We will ensure operatives use work equipment or other measures to prevent falls where they cannot avoid working at height; and if they cannot eliminate the risk of a fall, operatives will use work equipment or other measures to minimise the distance and consequences of a fall should one occur.

- All work at height is properly planned and organised;
- Those involved in work at height are trained and competent;
- The risks from work at height are assessed and appropriate work equipment is selected and used before work commences;
- The risks from fragile surfaces are properly controlled;
- Equipment for work at height is properly inspected and maintained.

3.37 **Ladders and Step-ladders** can be used for certain short-term operations. Managers/supervisors will assess the suitability of ladders for any particular operation. Operatives will be given regular tool-box talks on safe use of ladders.

3.38 **Work in confined spaces**, including tanks, deep excavations, chambers and any space with poor air circulation can be hazardous. When a work area is designated as a confined space a

specific risk assessment must be completed specifying the requirements for PPE, RPE (if required) and emergency escape.

- 3.39 **Excavations** will only be carried out after adequate planning. Prior to any excavation the manager/supervisor will obtain services drawings or contact the utilities companies to ascertain if there are pipes or cables in the vicinity. CAT and genny equipment will be used to confirm the accuracy of the drawings and the exact location of any underground services; safe digging procedures will be followed. If operatives will be required to enter an excavation planning will include shoring or battering excavations to prevent collapse. Where there is significant risk of someone falling into an excavation and being injured guardrails or some other form of fall prevention will be installed.
- 3.40 **Manual handling** will be avoided where this is reasonably practicable but there will be many occasions when materials or equipment will be required to be moved manually. Weights of items will be obtained and where possible lighter materials or smaller units obtained. Employees will be given training on safe ways of lifting and kinetic handling methods and risk assessments will highlight any other control measures.
- 3.41 **Noise** can lead to permanent health problems and disabilities over a period of time. Work will be planned to minimise exposure, and tasks involving noise will be identified, risk assessed, and appropriate control measures put in place. Employees will receive information and training in the form of toolbox talks and advice on effective control measures. Employee will be issued with the necessary PPE, including training and guidance on maintenance of this equipment.. Noise will be reduced by using different working methods or selecting quieter plant or equipment. Hearing protection zones will be marked and people not involved in the work kept away from the source of the noise. Noise levels will be monitored and Health Surveillance will be provided for those employees exposed to high levels of noise.
- 3.42 **Vibration** can lead to permanent health problems and disabilities over a period of time. Work will be planned to avoid or reduce exposure, and tasks involving vibration will be identified, risk assessed and appropriate control measures put in place. Tools will be purchased with the lowest vibration levels to do the task efficiently. The time that each worker uses high vibration tools, such as concrete breakers, angle grinder or hammer drills will be limited, as far as possible. All employees will received information and training in the form of tool box talks and advice on effective control measures so they know what the risk are from hand-arm vibration, and what they need to do to avoid those risks. All vibrating tools will be properly maintained, including keeping drill bits sharp. Vibration levels will be monitored and Health Surveillance will be provided for those exposed to high levels of hand-arm vibration, especially when exposed for long periods.
- 3.43 **Electrical tools** and leads will be checked each day before use by the user and weekly by an appointed person. PAT tests will be carried out every 3 months on portable site tools. Defective equipment will not be used. Generally only 110v and battery powered tools will be used on site, however if higher voltage equipment is required a separate specific risk assessment must be carried out.
- 3.44 **E H Humphries (Norton) Limited will assess the competence** of all companies employed to carry out works in a sub-contract role. The assessment will look at the sub-contractors safety procedures, supervision and the competence of its managers and operatives.

- 3.45 **Where consultation and communication** is required with other companies, E H Humphries (Norton) Limited is committed to ensure that employees are aware of health and safety requirements through the development and issue of procedures, work instructions, method statements, general memos, formal briefings and risk assessments. If further reinforcement of the safety message is needed toolbox talks are carried out as on-the-job training, during toolbox talks, inductions and other discussions with the workforce they are encouraged to raise concerns or suggest improved methods of working. Should there be members of the workforce that do not speak English , translated documents and pictorial inductions will be used, we require, however, that there is one English speaking member of the gang
- 3.46 **Display screen equipment** and work stations will be assessed periodically to ensure the working environment is satisfactory. Frequent users will be given advice and any necessary equipment to minimise discomfort, fatigue and eye strain caused through working with DSE.
- 3.47 **Smoking or Vaping is not permitted** in any workplace ie; offices, site locations, welfare facilities or accommodation controlled by E H Humphries (Norton) Limited. Suitable arrangements may be made in an area which does not affect other persons, these arrangements will comply with the current legislation and be specified on site rules.
- 3.48 **Where lone working** is a requirement for some of E H Humphries (Norton) Limited’s employees, E H Humphries (Norton) Limited will assess any additional risks operatives could be exposed to and provide training and other control measures to minimise these risks. Operatives must not undertake unaccompanied work without their managers knowledge.
- 3.49 **CDM 2015 Regulations:** E H Humphries (Norton) Limited acknowledges its responsibilities’ under the CDM 2015 Regulations as outlined below

CDM Dutyholders* – Who are they?	Summary of role/main duties –
Clients – are organisations or individuals for whom a construction project is carried out.	Make suitable arrangements for managing a project. This includes making sure: <ul style="list-style-type: none"> • Other dutyholders are appointed and are competent; • Sufficient time and resources are allocated; Making sure: <ul style="list-style-type: none"> • Relevant information is prepared and provided to other dutyholders (pre-construction information); • The principal designer and principal contractor carry out their duties; check a h&s plan & file is prepared • Welfare facilities are provided. • The project is notified where applicable If clients need help in making these arrangements, they could draw on the competent H&S Advice they are required to have under the Management of Health and Safety at Work Regulations 1999 (the MHSW Regulations).
Domestic clients – are people who have construction work carried out on their own home, or the home of a family member that is not done as part of a business,	Domestic clients are in scope of CDM 2015, but Their duties as a client are normally transferred to: <ul style="list-style-type: none"> • The contractor, on a single contractor project or; • The principal contractor, on a project involving more than one contractor. However, the domestic client can choose to have a written agreement with the principal designer to carry out the client

whether for profit or not.	duties.
Designers – are those, who as part of a business, prepare or modify designs for a building, product or system relating to construction work.	<p>*When preparing or modifying designs, to Eliminate, reduce or control foreseeable risks that May arise during:</p> <ul style="list-style-type: none"> • Construction; and * • The maintenance and use of a building once it is built. • Provide information to other members of the project team to help them fulfil their duties.*
Principal designers** – are designers appointed by the client in projects involving more than one contractor. They can be an organisation or an individual with sufficient knowledge, experience and ability to carry out the role	<p>Plan, manage, monitor and coordinate the pre-construction phase of a project. This includes:</p> <ul style="list-style-type: none"> • Identifying, eliminating or controlling foreseeable risks; * • Ensuring designers carry out their duties; * • Prepare and provide relevant information to other dutyholders; • Liaising with the client and Principal Contractor Organising cooperation between contractors and coordinating their work. • Prepare the H&S File (pre-construction), review it and update it as the project progresses * • Liaise with the principal contractor to help in the planning, management, monitoring and coordination of the construction phase for as long as their appointment lasts;
Principal contractors – are contractors appointed by the client to coordinate the construction phase of a project where it involves more than one contractor.	<p>Plan, manage, monitor and coordinate the construction phase of a project. This includes:</p> <ul style="list-style-type: none"> • Liaising with the client and principal designer; • Preparing the construction phase plan; * • Organising cooperation between contractors and coordinating their work. <p>Ensure:</p> <ul style="list-style-type: none"> • Suitable site inductions are provided;* • Reasonable steps are taken to prevent unauthorised access; • Workers are consulted and engaged in securing their health and safety; and • Welfare facilities are provided.
Contractors – are those who do the actual construction work and can be either an individual or a company	<ul style="list-style-type: none"> • Plan, manage and monitor construction work under their control so that it is carried out without risks to health and safety;* • For projects involving more than one contractor, coordinate their activities with others in the project team – in particular, comply with directions given to them by the principal designer Or principal contractor; • For single-contractor projects, prepare a construction phase plan.
Workers – are the	They must:

<p>people who work for or under the control of contractors on a construction site</p>	<ul style="list-style-type: none">• Be consulted about matters which affect their health, safety and welfare;• Take care of their own health and safety and others who may be affected by their actions;• Report anything they see which is likely to endanger either their own or others' health and safety; <i>(This is everyone involved in a project and must be reported to the person in charge of the work)</i>• Cooperate with their employer, fellow workers, contractors and other dutyholders;
---	--

3.50 **Where required a Temporary Works Coordinator** will be appointed who will ensure that a TW register is developed and a suitable design has been prepared for the relevant temporary works to be carried out, once erected an inspection of the temporary works will be carried out to ensure that it has been constructed to the design and monitored during its use to ensure that its integrity is maintained. The temporary works will include:

- Site Fencing/Hoarding
- Excavations
- Stockpiles
- Formwork, Falsework
- Propping
- Facade Retention
- Edge Protection
- Scaffolding
- Site Signage
- Equipment/plant foundations – tower crane bases, supports, anchors and ties for construction hoists and mast climbing work platforms.

All temporary works will be managed, coordinated, inspected and monitored during the execution of the works by a trained TW Coordinator and Supervisor

- 3.51 It is **E H Humphries (Norton) Limited's** policy that appropriate measures will be taken to ensure that the risk of staff developing symptoms of **Work Related Stress** during their work activities is reduced to the lowest possible level. E H Humphries (Norton) Limited will also provide support for those who may experience work related stress. E H Humphries (Norton) Limited will seek to identify all causes of workplace stress and will work to reduce stress levels that can be controlled by E H Humphries (Norton) Limited.
- 3.52 **E H Humphries (Norton) Limited** is aware of the vulnerability of new and expectant mothers to certain risks that may arise during their work. All reasonably practicable steps will be taken to ensure that health and safety of new and expectant mothers and their children that may be affected by their work activities. Potential hazards will be identified by risk assessment and suitable control measures will be put into place.
- 3.53 **Compressed Air** tools can be dangerous in many ways, for example:
- a) it can enter body orifices such as the mouth, ears and other cavities, causing severe and often fatal injuries;
 - b) at high pressure it can penetrate the skin;
 - c) particles or oil carried in an air jet can damage the eyes;
 - d) oil-coke deposits in a system can spontaneously ignite and cause an explosion;
 - e) vessels containing compressed air, even at comparatively low pressure, can explode violently once their integrity is lost; and
 - f) dirty or 'wet' air can lead to corrosion and blocked valves which may make the system unsafe.

E H Humphries (Norton) Limited will ensure safe working procedures are employed and only trained, competent employees will be authorised to operate compressed air tools. Hearing and Eye protection will always be worn when using this equipment

The efficient safe running of a compressed air system relies on cleanliness, filtration, cooling and lubrication. E H Humphries (Norton) Limited will operate the plant in accordance with the operator's manual and to draw up and follow a written schedule of maintenance work.. The written schedule will identify areas for attention, how often attention should be given and the responsibilities of those who carry out and supervise the work

- 3.54 **Abrasive wheels** and disc cutters present a high degree of risk to the users and persons close to the activity from flying particles, bursting wheels, contact with moving parts, dust , noise and vibration. E H Humphries (Norton) Limited recognises the need to reduce the risks associated with this type of equipment and will ensure
- a) Ensure all employees that operate this type of machinery are trained and competent
 - b) All abrasive wheels are inspected and maintained
 - c) Guards are fitted and used
 - d) Dust suppression is used
 - e) Hearing protection, Eye protection will be used when operating this equipment and also dust masks where appropriate
 - f) Discs will be stored in accordance with manufacturer's instructions
 - g) Equipment performing the same task but generating less noise and vibration will be selected over abrasive wheels

- 3.55 **Cartridge tools** are potentially lethal in the hands of the untrained. If at all possible an alternative, less hazardous method of fixing will be used. The hazards associated with the cartridge tools are, lack of knowledge and training, deliberate misuse including horseplay, poor maintenance. The operative will be adequately trained in the use of equipment and made aware of the hazards. They will be tested for colour blindness to ensure that the different coloured cartridges can be identified. Ear and eye protection, together with safety helmets will be used at all times. Cartridges will be kept in a locked metal box and only the required amount will be issued for the given task and all unused cartridges will be returned back to store at the end of the task, or at the end of every working day. Suitable ear protection to BSEN 352 and eye protection to BSEN 166B must be worn when operating these tools. Explosive charges shall be stored in a secure stowage separate to the tool. Only the required amount of charges to complete the task shall be issued to authorised persons. Operators must ensure that the work area is clear of other persons and flammable vapours prior to using these tools.
- 3.56 **Fall prevention/arrest harnesses** must be visually inspected before each use to ensure they are in a safe condition and function correctly. They must be thoroughly examined by a competent person at least once every six months. Defective equipment must be withdrawn from service. Harnesses and lanyards must not be altered or adapted in any way and must be stored unpacked in a cool, dark place and away from excessive heat or other possible cause of damage. The rear shelf of a car or van in direct sunlight is unsuitable for the storage of harnesses.
- 3.57 **Rescue Arrangements for operatives using harnesses** are a necessity due to the health hazards associated with being suspended in a harness for more than 5 minutes. Whenever harnesses are specified as a means of fall arrest the specifier must consider how a suspended person can be rescued and provide a written rescue procedure specific to that site. If work is adjacent to a scaffold the rescue procedure can utilise the scaffold structure; fitting boards as required to create a platform on which to bring the suspended operative. Alternatively plant and lifting equipment on site might be considered.
- 3.58 **Lighting** will be suitable and adequate to meet the requirements of the Workplace (Health, Safety and Welfare) Regulations and in accordance with HSG38 Lighting at Work. On construction sites, every part of the site that is inside will be, as far as possible, arranged so that natural light is available for people to see to do their work and move about the site safely. Where natural light is inadequate or not available, artificial lighting will be provided. Where work will continue outside daylight hours or the building or structure is enclosed, artificial lighting will be provided. The Principal Contractor will make sure that any artificial lighting does not change the apparent colour or visibility of any safety signs or other safety related items such as fire extinguishers. With both daylight and artificial light, shadows can obscure hazards both at the workplace (eg making it difficult to see the blade of a cutting disc or a drill bit) and on the site generally (eg at stairwells). If necessary, The Principal Contractor will provide extra lighting to illuminate shadow areas. Cabling and bulbs will be protected against breakage and a system will be in place for regularly checking bulbs to maintain electrical safety and to keep the site well-lit. Sub-contractors may be asked to provide task lighting.
- E H Humphries (Norton) Limited will ensure that lighting:
- allows people to notice hazards and assess risks;
 - is suitable for the environment and the type of work (for example, it is not located against surfaces or materials that may be flammable);
 - provides sufficient light (illuminance on the task);

- allows people to see properly and discriminate between colours, to promote safety;
- does not cause glare, flicker or stroboscopic effects;
- avoids the effects of veiling reflections;
- does not result in excessive differences in illuminance within an area or between adjacent areas;
- is suitable to meet the special needs of individuals;
- does not pose a health and safety risk itself;
- is suitably positioned so that it may be properly maintained or replaced, and disposed of to ensure safety;
- includes, when necessary, suitable and safe emergency lighting

3.59 **Safety signs and signals** will be used where, despite putting in place relevant control measures, a significant risk to the health and safety of employees and others remains. Signs will be clear and legible, and will be used to identify actions that are prohibited (eg no access), safeguards that must be followed (eg ear protection must be worn), warning of a hazard (eg corrosive material) and to direct towards fire exits/equipment or first-aid equipment.

3.60 E H Humphries (Norton) Limited is committed to the protection and promotion of the **mental health and wellbeing** of all staff.

E H Humphries (Norton) Limited shall continuously strive to improve the mental health environment and culture of E H Humphries (Norton) Limited by identifying, eliminating, or minimising all harmful processes, procedures and behaviours that may cause psychological harm or illness to its employees.

E H Humphries (Norton) Limited shall continuously strive, as far as is reasonably practicable, to promote mental health throughout E H Humphries (Norton) Limited by establishing and maintaining processes that enhance mental health and wellbeing.

3.61 **Epidemic or Pandemic**

- AN EPIDEMIC is a disease that affects a large number of people within a community, population, or region.
- A PANDEMIC is an epidemic that's spread over multiple countries or continents.

We will ensure, as a company, that we follow Government and Public Health England guidelines. A business specific risk assessment will be carried out and control measures put in place, ensuring the protection of any vulnerable workers as identified by these authorities; such as pregnant employees. Employees will be advised to stay at home if they are sick. Employees who can safely work from home will be encouraged to do so. Where possible video-conferencing or tele-conferencing will be used instead of holding face to face meetings. We will ensure that the appropriate training is undertaken should it be necessary for an employee to carry out an unfamiliar task.

3.62 **All waste** will be dealt with in line with current legislation and where a Waste Management Plan is in place we will work with the Principal Contractor to achieve its waste minimisation targets.

3.63 **Legionella** bacteria is the most well-known and serious form of a group of diseases known as Legionellosis. Breathing in small water droplets, contaminated with legionella bacteria can spread the infection and be extremely detrimental to human health. Legionella bacteria can survive under a wide variety of environmental conditions and as such it is important that any water systems are adequately maintained, cleaned, and regularly disinfected.

Where there is a risk of legionella bacteria to employees, contractors and all other visitors, E H Humphries (Norton) Limited understands that they have a legal obligation to ensure proactive and regular maintenance of any water systems within their premises and control and to carry out a suitable risk assessment.

To assess the risk, E H Humphries (Norton) Limited will –

- Arrange for all water systems to be professionally risk assessed in sufficient detail to identify and assess the risk of legionella from work activities and on-site water sources.
- Identify and assess who may be harmed or exposed to the risk
- Prepare a risk assessment with suitable control measures for prevention and controlling the associated risk
- Implement and manage appropriate control measures within the premises
- Maintain records and check that the implemented control measures are effective
- Provide training, instruction and supervision of persons with delegated responsibilities.

3.64 **Company Policies** – the most up to date versions of all company policies can be found at: <https://www.ehumphries.co.uk>. An indexed of all company policies can be found as appendix one of this policy.

This policy will be reviewed by the date below or as often as may be appropriate to take into account changes in the law affecting E H Humphries (Norton) Limited’s operations, or changes in E H Humphries (Norton) Limited and arrangements for carrying out this policy. Any revisions found to be necessary will be communicated to each employee.
